The Western Region Homeland Security Advisory Council presents:

CYBERSECURITY PREPAREDNESS CONFERENCE

Preparing and protecting a municipal or organization's computer system from cyber attacks can seem overwhelming and daunting. Many agencies end up doing nothing because they don't know where to begin.

In this Cybersecurity Preparedness Conference, attendees will learn the following:

- *Demystify Cybersecurity*
- *Effective Information Sharing Methods*
- *Critical Security Controls that can readily be applied to any system or network*
- *Emerging Cyber Threats and how to prepare*
- *Steps to take if you experience a cyber attack/ incident*
- *Explore regional municipal solutions*
- *Current and future cybersecurity efforts at the local, state and federal level*
